

OUR PRODUCTION

SWEDEN

Hofors/Hällefors
100t EAF. Ingot casting of higher alloyed and high-quality clean steel. Bar, tube, rings.

FINLAND

Smedjebacken/Boxholm
125t EAF. Billet-sized continuous casting. Specializes in flat/profiled bar.

INDIA

Khopoli
50t EAF. Ingot and continuous casting process. Specializes in clean steel, bar and rings.

JAPAN

Kyushu
BOF. New 350t continuous casting. Wide range of bar and wire. In-house secondary processing facilities.

Kansai
BOF. Continuous casting. Produces large diameter bar as well as seamless pipe and tube.

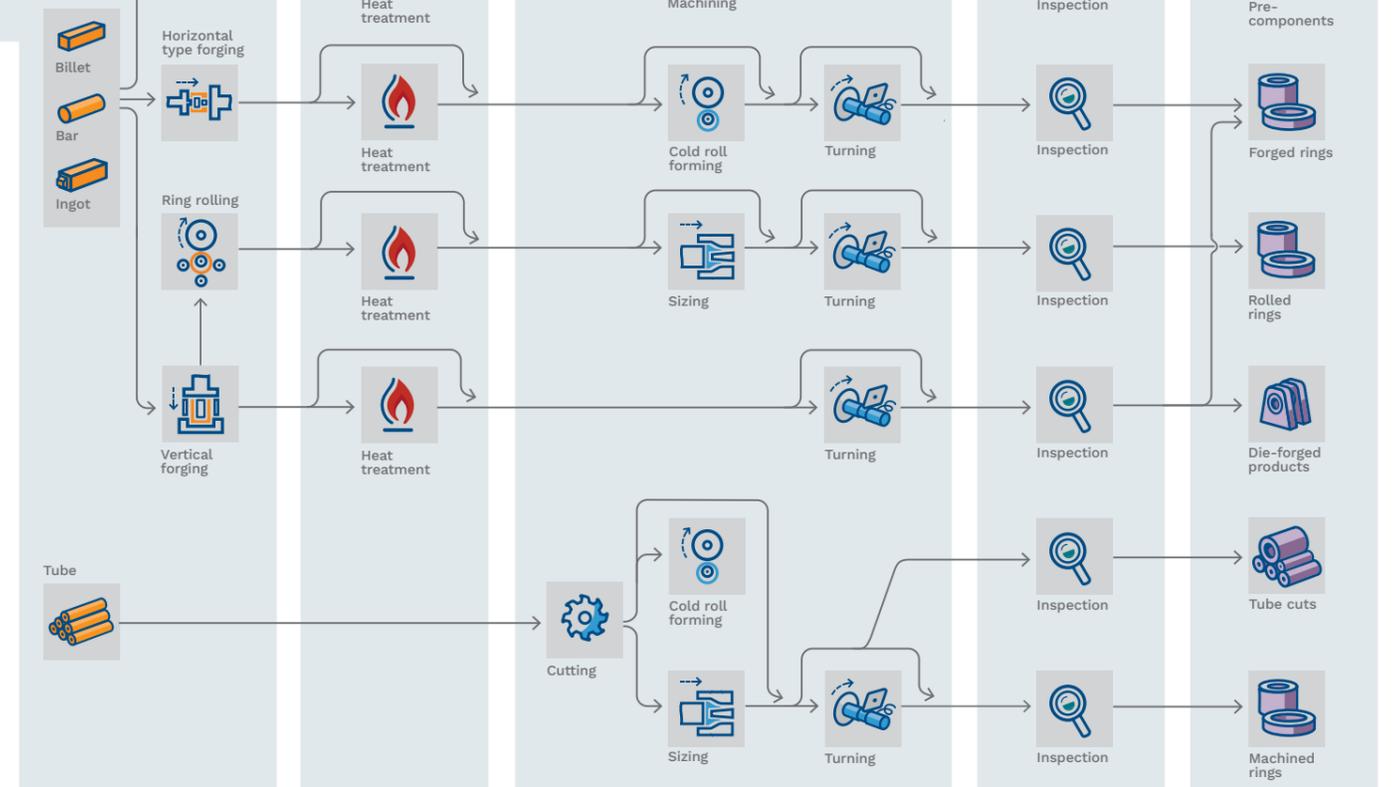

Himeji
150/60t EAF. Vertical continuous casting. Bearing/alloy/stainless/tool steel. Bar, tube, rings.

East Nippon
BOF. Continuous casting. Specializes in high carbon wire, specialty steel wire for cold heading.

Muroran
BOF. Continuous casting. Wide range of bar and wire. In-house secondary processing facilities.

We also produce a world-leading range of hard-chromed bar and tube. Metal powder with a consistent round shape formed by spraying gas into metal melted in vacuum is another speciality. This also allows us to manufacture all kinds of powder metallurgy products and sputtering targets.
